

WE KNOW COOLANT.

STOUGHCOOL
WE KNOW COOLANT.

JET Series

Stoughcool's Jet series is a new generation of technology utilizing its unique C80 Shield™ Technology which provides excellent resistance to bacteria resulting in exceptionally long sump life and a clean and safe working environment. Never again will sump odor be an issue when using a Stoughcool Jet series product. Do it all with one Jet product that fits your machining demands.

JET 1

A chlorine free durable micro-emulsion with excellent cooling and lubricating properties coupled with excellent corrosion protection.

JET 3

A micro-emulsion formulated with vegetable oil technology combined with additional lubricating properties that can be used on both ferrous and non-ferrous metals and is chlorine free.

**JET 3
EP**

A moderate-to-heavy duty high performance hybrid micro-emulsion with extreme pressure lubrication for both ferrous and non-ferrous materials.

JET 5

A heavy duty soluble oil with extreme pressure lubrication for both ferrous and non-ferrous materials.

JET 636

An extreme heavy duty soluble oil recommended for creep feed grinding, centerless grinding, broaching and gun drilling applications.

JET 7

A moderate-to-heavy duty high performance hybrid micro-emulsion recommended for both ferrous and non-ferrous materials.

JET 9

A heavy duty high performance chlorine free micro-emulsion that can be used for both ferrous and non-ferrous materials.

**JET 9
LX**

A heavy duty micro-emulsion with extreme pressure lubricants that can be used for both ferrous and non-ferrous.

**JET 9
PXD**

An extreme heavy duty high performance micro-emulsion that can be used for both ferrous and non-ferrous materials.

**JET 9
AV**

A high performance heavy duty micro-emulsion that is an excellent choice for aerospace materials for both ferrous and non-ferrous metals.

Jet Advantages

- No bad sump odors
- Extremely long sump life
- Low coolant consumption
- Low foam formula
- Non-staining excellent for all metals
- Does not contain phenols, nitrites or DCHA
- Extremely clean

Stoughcool® exclusive
bacteria resistant technology

Synthetics

Our synthetic coolants are formulated to run virtually clear in machines, provide clean and easy chip flow with none to low mist levels. Using our proprietary ester technology, Stoughcool synthetics have the lubricity to handle tough applications without leaving a sticky or heavy residue. These high performance synthetics reject all tramp oil making it easy for skimmers to remove waste and provide excellent tool life and sump life. Most Stoughcool coolant end users who switch to our synthetics always conclude that they have drastically decreased their coolant usage after making the switch to a Stoughcool synthetic.

E20 - A high performance multi-purpose synthetic that has excellent cooling properties, lubrication and strong corrosion protection.

E25CG - A clean high performance carbide grinding coolant.

E350 - A high lubricity synthetic with excellent corrosion protection recommended for ferrous metals.

E370 - A heavy duty high lubricity synthetic with excellent corrosion protection recommended for ferrous metals.

E787 - An extreme heavy-duty synthetic that excels on aluminum and can be used for both ferrous and non-ferrous metals.

Glass Grind XT - A high performance glass grinding coolant.

Packaging and Shipping

Stoughcool coolants are packaged in 5 gallon pails, 55 gallon drums and 275 gallon totes. Most all motor freight orders will ship out same day if ordered by noon that day.

Additional Products

Cutting Oils

Jet Kut 80 - Neat cutting oil

Jet Kut 90 - Neat cutting oil

Grinding Oils

Jet Grind 10 - Neat grinding oil

Jet Grind 44 - A PAO high performance grinding oil

Rust Prevention

Silvershield 600 - Oil Based rust preventative

Silvershield 700 - Oil/Solvent blend rust preventative

Silvershield 800 - Solvent based rust preventative

Hydro RP - A water soluble rust preventative and hydro testing fluid.

Tapping Fluids

Jet Tap Paste - High performance tapping paste

Jet Tap Tough - Heavy Duty tapping oil

Cleaners

The Slam - Sump cleaner

Force 1 - General purpose floor and surface cleaner

Way and Hydraulic Oils

Waylube 68 - Waylube oil

Waylube 220 - Waylube oil

AW 32 - Hydraulic oil

AW 46 - Hydraulic oil

AW68 - Hydraulic oil

Additives

CT 10 - Alkalinity stabilizer

Foam Bust 45 - Foam depressor agent
